

Final Exam Review

CS 2308
Spring 2017

Jill Seaman

1

Final Exam

- Tues May 9, 8am-10:30am
- Here (Derr 234)
- Closed book, closed notes, clean desk
- Comprehensive (covers entire course)
- 35% of your final grade
- Bring your ID card, I may check.
- Bring a number 2 pencil and eraser.
- No headphones/earphones.

2

Exam Format

- 100 points total:
 - * 48 pts:
 - Multiple choice (scantron form)
 - 24 questions
 - * 52 pts:
 - Writing programs/functions/classes/code
 - Finding errors in code

3

Content

- 100 points total (approximate break down):
- Unit 1 (15pts)
 - Unit 2 (15pts) (including analysis)
 - Unit 3 (15pts)
 - Unit 4 (15pts)
 - C++ Programming on Linux (10pts)
 - Unit 5 (15pts)
 - Unit 6 (15pts)

4

Unit 1: Functions, Arrays & Structs

- Know how to program with functions, arrays and structures.
- Passing parameters by reference (and value)
- Scope rules
- Be able to process arrays (& arrays of struct)
 - Be able to find the minimum/maximum value!
 - See review exercises
- Be able to trace code
- Be able to find errors in code

5

Unit 2: Searching, Sorting & Analysis

- Searching
 - Linear Search
 - Binary Search
- Sorting
 - Bubble Sort
 - Selection Sort
- See review exercises:
 - Sample exercises to demonstrate algorithms
 - Be able to code linear search

6

Analysis of Algorithms: efficiency

- Efficiency
 - Growth rate functions, which are faster/slower
 - Use big-O notation
 - Efficiency of
 - ▶ searching/sorting algorithms
 - ▶ array access and traversal
 - ▶ linked list operations
 - See the Final Exam Review Exercises for good coverage on this

7

Unit 3: Pointers & Dynamic Memory Alloc

- Pointer variables: how to define + initialize
- Address of (&) and Dereferencing (*) operators
- Pointers and arrays
 - * an array variable is the address of its first element
 - * $\text{array}[\text{index}] = *(\text{array} + \text{index})$
- Dynamic memory allocation
 - * new + delete operators
 - * allocate new arrays (duplicateArray, etc.)
- Pointers as parameters (call by reference, arrays)

8

Unit 4: Intro to Classes

- Procedural vs object oriented programming
- Encapsulation, Data hiding, Interface
- Fundamentals of classes and objects:
 - Members: variables and functions
 - private vs public, const
 - declaration and implementation of classes
 - ▶ class declaration
 - ▶ defining member functions
 - instances and the dot operator
 - inline member function definitions
 - constructors and destructors
 - arrays of objects

9

C++ Programming on Linux

- Basic shell commands, know how to use
- edit, compile, run (nano, g++, a.out)
- Compiling multiple files:
 - How to split up code, what goes where
 - g++ a.cpp b.cpp
 - separate compilation
 - g++ -c a.cpp
 - g++ -c b.cpp
 - g++ a.o b.o
 - makefile: understand the ones used for the assignments, know how to use them

10

Unit 5: Linked Lists

- Pointers to Struct: declaration, access ($s \rightarrow x$)
- LL Organization: nodes, head pointer, empty list, NULL
- Linked list tasks: T1-T11:
 - create empty list, create a new node
 - add to front of list
 - append to end of non-empty list
 - traversing a linked list (display, count, sum, etc)
 - how to advance 2 pointers together (n and p)
 - delete given n and p, special cases
 - insert given n and p, special cases
 - linked list destruction
- Arrays vs Linked Lists (see ListADT, last 2 slides)

11

Unit 6: Stacks and Queues

- ADT, LIFO and FIFO
- 4 basic operations of each data type:

pop	enqueue	isEmpty
push	dequeue	isFull
- Be able to show contents of stack or queue after a series of operations
- Be able to implement the operations using a static array or a linked list.
- Be able to use a stack to solve a problem like matching brackets.

12

Sample Problems

See the lecture notes titled:

Final Exam Exercises

on the website

13

Office Hours finals week

Day	Date	Time
W	5/3	11:00am-12:00noon
Th	5/4	2:00pm-3:00pm
M	5/8	11:00am-12:00noon
T	5/9	11:00am-12:00noon
		and by appt!

14

How to Study

- Start with the topics from this set of slides.
- Use the regular semester lectures to make sure you understand the topics (quiz yourself, use the Top Hat questions).
- Use the textbook to make sure you understand the lectures about the topics.
- **Do** the review exercises on the Final Exam Exercises slides. Do book exercises. Practice!!
- Go over the exams and assignment solutions (fix yours).
- Discuss with others! (and get some sleep)¹⁵
