LAB POLICY
CS5301 Fall 2018
Jill Seaman

When class is being held in the computer lab:
• There is no collaboration allowed during the lab: you must write your own code.
• If you have a question or a problem, please raise your hand to receive assistance from a lab instructor or the professor.
• Do not include code obtained from the internet or from another student in your program (except what is provided by the instructor).
• Do not email or otherwise provide an electronic copy of your program to another student.
• Do **not** bring printouts of problem solutions.
• Do not access your email or U-drive or any online storage account (except at the end of lab, it is a good idea to save a copy of your lab exercise solutions on your U-drive before you leave).
• You must include your **net-id** in a comment in each *.cpp file that you submit.

Reference material during lab:
You are encouraged to use the following during lab:
• Code posted on the class website.
• The textbook.
• The lecture slides (printouts or on the class website).
• Your own written notes.
